Namrata and James

# Project Idea

Customizable newsletter!

customers get an email newsletter that's customized to their preferences that they choose on their topic choices. They can also use the web application to browse older news on topics, and view ratings of different Topics and Writers. This app is designed to mitigate the annoyance of having to scroll through other newsletter services to find topics that you actually want to read about. This is a quick summary for all your news needs!

# Layout

Login/Signup

Topics page (News summaries)

Topic Learn more to get more info

Navigation Bar at top for search and profile ect.

Writers ability to create a post/Newsletter

Ability to read and write reviews/respond to them

# Responsibilities

Namrata - Front End and Customer Side

James - Back End and Provider Side
